

Plastic Slab Bolster

**Sold in 5ft. Lengths and 100ft per bundle.*

DESCRIPTION:

The OCM Plastic slab bolster is a heavy duty plastic slab bolster that can be used to support rebar in all types of slab or wall applications.

UNIQUE FEATURES AND BENEFITS:

- Interlocking end tabs provide extra strong connection and enables continuous runs of slab bolster.
- Made from heavy duty yet flexible plastic material which will withstand heavy loads, but still flexible enough to bend 180 ° for side wall spacers and resistant to breaking and snapping.
- Wide footprint provides stability under load.
- Continuous protrusions on the top runner allows the user to consistently space rebar during placement and reduces rebar movement during placement.
