

Coil Thread Drop In Anchors

Description:

OCM Coil Thread Drop In Anchors are internally threaded Drop In Expansion Anchors used with either 1/2" or 3/4" Diameter Coil Rod, and are set in place by the use of the Setting Tool after the anchor is placed into the properly sized pre-drilled hole.

Features:

- Made from Carbon Steel
- Makes One-Sided Forming easier
- Coil Rod can be set into existing concrete quickly and easily

Additional Notes: *SWL provides a safety factor of approximately 2 to 1.*

Item Number	SWL (For 2000 Psi Concrete) (lbs)	D Size (in)	Drill Bit Size Must Use (in)	Weight Per Piece (lbs)	Box Quantity
