

Pro Chairs

Description:

OCM, Inc's Pro Chairs are made with high performance, high strength polymer composite material that won't rust. The cradle shaped head will provide aid in positioning rebar. The 2-in-1 cradle head allows for one Pro Chair to be used for two different heights, reducing the amount of inventory you need to take on.

Features:

- Made with high performance, high strength polymer composite to withstand extreme temperatures and support very heavy loads.
- Made in the USA to meet all Federal BABA and State DOT requirements.
- The 2-in-1 dual height cradle allows for rebar positioning at 2 different heights and reduces inventory in half.
- Greater stackability provides for smaller boxes, less inventory space, and more compact shipments.
- Reduced labor—easier to carry and place more Pro Chairs at a time vs any other chair in the market.
- Tapered foot design for minimal surface contact on wood decks, in tilt-up panels, and in precast steel forms.

Additional Notes: OCM Wheel Spacers meet CRSI Requirements

Item Number	Weight Per Piece (lbs)	Carton Quantity	Description	Height (in)
PHC1-1.5-PRO	0.0406	500	POLYMER COMPOSITE PRO CHAIR - 1" - 1-1/2" - 500/BOX - 18000/SKID	1" - 1-1/2"
