

OCM-SB

OCM, Inc's Snap Brackets are made from heavy gauge galvanized steel for the body and a cadmium-plated wedge for protection against corrosion. The Snap Brackets are designed for easy installation and can be installed in a variety of ways. The Snap Bracket uses 4-3/4" Snap Ties, and accommodates lumber variations. When using the Snap Brackets and the Hex Head Snap Ties, the Ties will break off inside the concrete leaving clean holes, minimizing stripping time and labor.

Part Number	OCM-SB
Weight Per Piece (lbs)	1.2
Finish	Plated
Bucket Quantity	50
